

# The Hidden Markov Model algorithm

as part of the software project scientific computing WS2014/15

"Who did what?" in chronological order:

Tobias	Christoph	Maikel
generating test sequences	prototype	unittests
-	training by model	first C-ext
-	-	pythonic project structure, working C and fortran kernel, opencl
chunked python version	model comparison, initial model	-
use_hmm	-	-

+ everyone involved in debugging, documenting.
